RECYCLING OUR PRODUCTS

FOODWRAPS

Prepping and clean up is a breeze with Emperor's catering foil, cling wrap and baking paper, all available in dispensing boxes with built in slide cutters.

Emperor greaseproof paper sheets are the perfect choice for fish and chip takeaway outlets that need a food grade sheet to absorb fats and oils. Use these food grade sheets to line cardboard takeaway trays and your customers will appreciate how good their food looks!

Catering Foil Roll

About Us

Quality, trusted product range

Emperor products are designed with quality in mind. Product quality is assured by regular monitoring and inspections of production facilities, and testing and quality control procedures.

We engage an independent agent to inspect and test each shipment following production and prior to dispatch.

Emperor consistently monitors all manufacturing procurement systems and encourages socially and environmentally responsible policies and fair-trade practices. And we only select product manufacturers who comply with international standards and certifications.

We're all about providing first class service

Emperor's Food packaging specialists have a wealth of industry and product knowledge. They are here to provide you with first class service through product guidance, technical advice and solutions to help your business grow.

Our efficient logistics, dispatch methods and transport agents all work together to make sure our products are delivered to warehouses safely and efficiently.

The people behind the Emperor brand

Emperor products are imported by Unipak – New Zealand's leading supplier, importer and wholesaler of food packaging and personal barrier protection products. Unipak has distribution centres located in Whanganui and Christchurch and has been operating as a distributor since 2004. Unipak distribute the Emperor brand through their nationwide footprint of industry-specific resellers.

Recycling Our Products

At Emperor we understand the importance of waste minimization. Our products are purchased and used by end users for a short period of time before becoming waste. When people buy food and drinks in disposable containers they are also buying the packaging. We must all take responsibility for disposing of used packaging correctly. Emperor encourages everyone to take ownership of waste disposal and promotes the correct recycling of used packaging where possible.

Plastics

Which plastics can be recycled in New Zealand

PETE (1) is currently accepted by most Councils around New Zealand for recycling (please check with your local collection agency).

The Emperor range has some packaging products that are made from plastic codes 2, 4, 5 and 6. Not all Councils around New Zealand will accept these plastics, as different Councils have different collection guidelines. If you are unsure whether a particular plastic can be recycled in your region, then we recommend you check with your local collection agencies.

All plastic food and drink products are more likely to be recycled if all food and drink deposits are removed from used containers and there are no grease or oil contaminants.

Recycling Code 1: Polyethylene Terephthalate (PET)

Used to make some of our Cups, Containers and Food Trays

- Tough
- Lightweight
- Long shelf life
- Good barrier to elements outside of the container
- Crystal clear and optical clarity
- Resists water, oxygen, CO₂ and most solvents
- Resists high impacts
- Can be filled with hot liquids

When recycled, the plastic is used to make: New Containers, Strapping, Carpet Fibres, Clothing, Cushion/Jacket Filling.

Recycling Code 2: High-Density Polyethylene (HDPE)

Used to make our white butcher bags.

- Resists most solvents
- High strength characteristics
- Stiff material

When recycled, the plastic is used to make: New Containers, Piping, Edging, Bins.

Recycling Code 4: Low Density Polyethylene (LDPE)

Used to make some of our Plastic Bags and Film.

- Very versatile
- Lightweight
- Translucent
- Resists water and oxygen

When recycled, the plastic is used to make: Rubbish Bin Liners, Floor Tiles, Compost Bins and Outdoor Furniture.

Recycling Code 5: Polypropylene (PP)

Used to make some of our Meal Trays, Takeaway Containers, Cups, Refrigerated Food Containers, Straws and Cutlery.

- Very versatile
- Tough
- Lightweight
- Translucent
- Good chemical resistance
- Good heat resistance
- Great optical clarity
- Low moisture vapor penetration

When recycled, the plastic is used to make: Automotive Products, Household Tools/Utensils, Outdoor Tools, Trays.

Recycling Code 6: Polystyrene (PS)

Polystyrene (PS) is used for some of our clear or white rigid products: Cups and Cutlery.

- Good rigid structure
- Good short shelf life moisture barrier
- High optical clarity

When recycled, the plastic is used to make: Light Switches, Plastic Mouldings, Packaging, Desk Trays.

Aluminium

Aluminium is very easy to recycle, time and time again. Recovered materials should also be kept free of grease and cleaned before depositing in recycling bins. Our foil dishes contain varying percentages of recycled aluminium.

Cardboard and Paper

Cardboard and Paper can be a challenge to recycle if they are not kept free of grease and oils before being deposited in recycling bins. This is hard to wash off as, unlike plastic and aluminium, cardboard and paper is not waterproof. Wherever possible we encourage our customers to use a greaseproof lining paper to protect cardboard packaging so as to increase the chance of the cardboard containers being recycled.
